Hi {name},

We're thrilled to welcome you to our exclusive beta program for the new Evercast for Windows! A beta version means that it's still under development, but you get to try it before it's officially released to the public.

Will you help us, so we can help you in the best possible way? Here's your chance to give valuable feedback before it's released.

What is it?

A desktop version of Evercast offering easier access, improved performance, and greater stability.

Some features you're used to in Evercast are currently missing in the beta:

- Record a meeting
- Recording playback
- Guest access
- Apple TV login
- Two-factor authentication

Don't worry, they'll be included in the final product.

How do I get it?

1. Go to this [download page](#).
2. Click the **Download now** button.
3. Follow your computer's instructions for downloading the app.
4. Open Evercast for Windows.
5. Sign in to access your dashboard.

How long can I use it?

You can use the beta version for two weeks.

How do I give feedback?

We'll send you a short survey in seven days.

Thanks so much for your time! If you have questions or need help with the beta, [contact our support 24/7](#).

Happy streaming!

Team Evercast
